

REEVES® PULLEYS

RENEWAL PARTS

REEVES SENIOR PULLEY REBUILD KITS

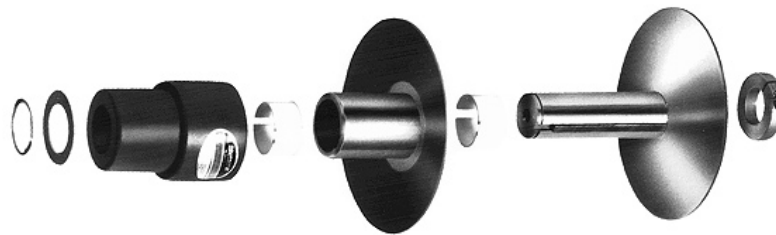

Rebuild Kits consist of all high wear components that are routinely replaced when servicing a pulley:

- Spring cartridge
- Retaining Ring
- Clamp Collar
- Key
- Bushing
- Washer

Rebuild kits provide several benefits when stocked as spare parts at a user location.

- Protection from excessive down time that can occur following unexpected equipment down-time.
- Parts on hand for routine scheduled maintenance.
- Boxed kit may be identified to a specific machine eliminates searching for individual components.

Pulley Size	Rebuild Kit	Kit Consists of:				
		Spring Cartridge	Retaining Ring	Clamp Collar	Bushing Kit (1)	Washer

(1) Bushing Kit includes the bushing, key, grease, MSDS sheet and instruction sheet.

If the pulley disc is required, it is more economical to purchase the complete pulley assembly.

Senior Pulley – Easy to apply, easy to install and easy to maintain.

- ¼ to 15 HP
- Uses industry standard wide range belts
- Self-contained spring cartridge for safety
- 3:1 Speed Range
- Stock Taper-lock flat face pulley is driven sheave
- XV Features on ¼ HP – 10HP models

XV Features Include:

- Sliding disc rides on tough engineered Elastomeric Bushing: Eliminates the need for lubrication; Will not corrode or stick; quick, easy replacement
- Clamp Collar Mounting (Collet-style hub secured by compression clamp) for superior shaft grip, concentric mount keeps wear and vibration to a minimum and no fretting corrosion means easy removal for maintenance
- Ductile Iron Discs that are naturally balanced because they are machined all over means smooth running, also stronger and more wear resistant than cast iron or steel
